

**DETERMINING A NODE PATH  
THROUGH A NODE GRAPH**

**ABSTRACT**

5           Determining a node path through a node graph includes  
modifying the node graph in accordance with a predetermined  
platform performance, performing a path finding process  
through the node graph to obtain the node path, determining if  
the platform performance has changed, adjusting the node graph  
10 to compensate for a change in the platform performance, and  
re-performing the path finding process through the adjusted  
node graph to obtain the node path.
